

Street Art

IXD 617 - Jaehoon Kim

STATEMENT OF INTENT

Initially targeted as a growing urban issue for many cities, graffiti has become a part of the art world. Beginning in the early 1970s from the NYC subways and Philadelphia, graffiti has spread to the rest of the US, Europe and other world regions.

Graffiti brings life to dead spaces. Street art gives voice to their location. Now there are famous street artists, such as Banksy. People take pictures of their work and get inspiration. The goal is to create an app to find street art.
